W06-P1: Play TicTacToe in Vercel

=> Show TicTacToe in Vercel

The screenshot shows a development environment with a code editor and a browser window. The code editor displays the file `w06_43.md`, which contains the source code for a TicTacToe application. The browser window shows the final product: a TicTacToe game titled "Tictactoe -- VIC". The game board has three columns of three squares each. The first, third, and fifth squares in the top row contain an 'O' (green). The second square in the middle row contains an 'X' (red). The fourth and sixth squares in the bottom row contain a '+' sign (grey). Below the board is a green button labeled "Reset Game". The entire green header area is highlighted with a red box.

W06-P2: Show tours from tours_43 array in p5_43

=> all tours are the same

The screenshot shows a browser window displaying two identical tour cards side-by-side. Both cards feature the Louvre Pyramid at night and are titled "Best Of Paris In 7 Days Tour" with a price of \$1,995. A "Not Interested" button is visible below each card. The browser's developer tools are open, with the Elements tab selected. The "single-tour" class is highlighted, and its CSS definition is shown in the Styles panel:

```
.single-tour img { width: 100%; height: 20rem; object-fit: cover; border-top-right-radius: var(--radius); border-top-left-radius: var(--radius); }
```

The JavaScript code in the p5_43.js file is also visible on the left, showing the creation of a single tour card template and its repetition for all tours in the tours_43 array.

```
1 import { tours_43 } from "./data_43.js";
2
3 const section = document.querySelector(".section-center");
4
5 const displayTours = () => {
6   const toursInfo = tours_43;
7
8   .map((tour) => {
9     return `
10       <article class="single-tour">
11         
12         <div class="tour-info">
13           <h4>Best of Paris in 7 Days Tour</h4>
14           <h4 class="tour-price">$1,995</h4>
15         </div>
16         <p>
17           Paris is synonymous with the finest things
18           offer – in art, fashion, food, literature,
19           tour, your Paris-savvy Rick Steves guide will
20           very best of ...<button>read more</button>
21         </p>
22         <button class="delete-btn">not interested</button>
23       </article>;
24   })
25   .join("");
26   section.innerHTML = toursInfo;
27   console.log(toursInfo);
28 };
29
30 window.addEventListener("DOMContentLoaded", () => {
31   displayTours();
32 });
33 console.log("tours_43", tours_43);
34
```

=> each tour is different based on the info in tours_43 array

The screenshot shows a code editor on the left and a browser window on the right. The code editor displays `p5_43.js` with a red box highlighting the section where tours are mapped into articles. The browser shows two tour cards: "Best Of Paris In 7 Days Tour" and "Best Of Ireland In 14 Days Tour". Each card has a "Not Interested" button. The browser's developer tools are open, showing the DOM structure and CSS styles for the tour cards.

```
1 import { tours_43 } from "./data_43.js";
2
3 const section = document.querySelector(".section-center");
4
5 const displayTours = () => {
6   const toursInfo = tours_43
7     .map((tour) => {
8       return `<article class="single-tour">
9         
10        <footer>
11          <div class="tour-info">
12            <h4>${tour.name}</h4>
13            <h4 class="tour-price">$${tour.price}</h4>
14          </div>
15          <p>
16            ${tour.info}<button>read more</button>
17          </p>
18          <button class="delete-btn">not interested</button>
19        </footer>
20      </article>`;
21    })
22    .join("");
23   section.innerHTML = toursInfo;
24   console.log(toursInfo);
25 };
26
27 window.addEventListener("DOMContentLoaded", () => {
28   displayTours();
29 });
30 console.log("tours_43", tours_43);
31
```
